Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 14-18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-25, 4-16, 1-12, 1-15 of U.S. Patent No. 6,156,270, 6,019,944, 5,885,527 and 5,458,852 respectively. Although the conflicting claims are not identical, they are not patentably distinct from each other because both are directed to a device creating a differential flow rate by arrangement of hydrophobic and hydrophilic zones along a capillary flow path.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Art Unit: 1743

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-18 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Kuhn et al.

See the appropriate paragraph of paper 9.

Kuhn et al. further teaches predetermined liquid flow paths that lead the sample to the reagent area. In column 4 lines 40+ specifically describe the sample is prevented from laterally moving from the sample receiving site by impermeable barrier means. These impermeable barrier means have been read on the claimed channels.

Response to Arguments

Applicant's arguments filed 10/22/03 have been fully considered but they are not persuasive.

Applicant's perspicacity is appreciated in detecting the typo-graphical error in reference to USP 6,019,994. Further, application of Kuhn et al. under 35 USC 102(b) in the prior Office action has been reconsidered. USP 5,458,852 does contain the claimed subject matter and properly provides priority to the filing date of 5/21/92. The Office has applied Kuhn et al. under 35 USC 102(e).

Art Unit: 1743

Applicants traverse Kuhn et al. because this reference does not contain channels. The Office does not agree and directs Applicants to the abstract and column 4 lines 40+ as examples that Kuhn et al. teach a liquid flow path with impermeable barriers which has been fairly read on the claimed channels.

Applicants traverse the application of Kuhn et al. to claims 2-3, 6 and 12. The Office maintains because Kuhn et al. teaches an identical structure to that claimed and performs the identical method of applying a sample in a channel to migrate to a reagent, it must inherently have the same effects that are recited in the above claims.

Dr. Buechler 10/21/03 Declaration was not convincing. The Office agrees with all of the characterization made about what is intended by a channel. As elaborated above, it is believed that Kuhn et al. clearly meets all of these limitations.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
